Title: CCIT™ Fact Sheet

The CCIT™ Fact Sheet (hereinafter, the "document") is provided as a convenience to Members and is for information purposes only. Although FICC may make this document available to Members, it shall be under no obligation to do so, nor having once or more done so, shall FICC have a continuing obligation to make available this document or other related information of a certain type.

FICC does not represent the accuracy, adequacy, timeliness, completeness, or fitness for any particular purpose of any information provided to Members in this document, which is provided as-is. FICC shall not be liable for any loss related to such information (or the act or process of providing such information) resulting directly or indirectly from mistakes, errors, or omissions, other than those caused directly by gross negligence or willful misconduct on the part of FICC. FICC shall not be liable for: (1) any loss resulting directly or indirectly from interruptions, delays, or defects arising from or related to providing this guide; and (2) any special, consequential, exemplary, incidental, or punitive damages.

Further, the information contained in this document is subject to change. Members and other authorized users of the document will find the most current version of the document on DTCC's Learning Center site, www.dtccllearning.com. FICC shall bear no responsibility for any losses associated with the failure of Members or other authorized users to follow FICC's most current document.

CCIT™ FACT SHEET

The Fixed Income Clearing Corporation (FICC), a wholly-owned subsidiary of DTCC, is the leading provider of trade comparison, netting and settlement for the U.S. Government securities marketplace. FICC's Government Securities Division (GSD) was established in 1986 to provide automated comparison and settlement services, risk management benefits and operational efficiencies to the Government securities industry. GSD clients include the nation's major brokers and dealers, as well as a wide range of entities that trade U.S. Government securities.

Through an innovative suite of new and expanded service offerings, FICC leveraged its battle-tested infrastructure and proven technology to expand the availability of central clearing to the bilateral repo market.

CENTRALLY CLEARED INSTITUTIONAL TRI-PARTY (CCIT™) SERVICE

FICC is the only central counterparty (CCP) platform in the U.S. that clears tri-party repo and debt transactions. Since 1998, FICC's GCF Repo® Service has enabled its Dealer Members to trade FICC-cleared general collateral repos with each other based on rate, term and underlying product through the day without requiring intra-day, trade-for-trade settlement on a Delivery-versus- Payment (DVP) basis.

As an expansion of the GCF Repo® Service, the CCIT Service extends FICC's CCP services and guarantee of completion of eligible trades to tri-party repo transactions between GSD Dealer Members and eligible tri-party money lenders.

- **Trade Submission and Matching:** For trade matching purposes, GSD accounts for tri-party money lenders may be opened at the legal entity level or at the joint account level. Investment advisers, agent lenders or other authorized agents may submit trades to FICC on behalf of their tri-party money lender clients.
- **Tri-Party Account Requirements:** Each tri-party money lender or joint account, as applicable, will also be required to open a specific tri-party account for the CCIT Service at the applicable tri-party bank.

BENEFITS OF REPO CLEARING AT FICC

Reduction of counterparty risk by guaranteeing the completion of settlement in a member default scenario:

- CCP guarantee may mitigate risk of a large scale exit by institutional investors in a stress scenario.
- A centralized liquidation of a failed counterparty by FICC would reduce the risk of "fire sales" that drive down asset prices and spread stress across the financial system.

Members could be eligible for balance sheet and capital relief. Centrally clearing these transactions at FICC could alleviate the constraints on borrowers as it may enable them to:

- Reduce capital usage via netting, potentially enabling the redeployment of scarce capital to other uses.
- Apply lower risk weights in their risk-based capital ratios.

Lending through FICC offers institutional investors potential growth of their on-loan balances and income as borrowers shift their demand to CCP channels.
